DEDICATION

"I just grow beautiful roses". This is a great understatement of what Dewey Beville, the grounds and garden keeper at ASU-Beebe, has contributed to our campus. For 6 years, he has cared for the shrubbery and had a cheerful smile for everyone. Dewey not only cares for plants, he cares for people.

What do all these words mean? These were the thoughts that went through a freshman's mind during registration. The lines and cards were all a part of the new life that the new student undertook in the strange world of college life. For the 540 incoming freshmen, this was a time of . . .

Or Cummuting . . .

Struggling with books and car doors, killing time between classes with pool at the student center, braving flat tires . . . such is the life of the commuter. ASU isn't only for home-town people. The door of education is open to everyone. Commuters composed 83% of the student body in 1976-77.

The SGA is the means by which the student body voices its opinion, makes decisions, and plans activities throughout the year. Helping in these decisions are the dorm and club representatives. The SGA sponsors activities such as the Autumn Frolics and Christmas dances that involves the entire student body. And involvement is all part of what college is.

The Mud, The Blood And The Beer!

Autumn Frolics is a time of fun, sun, games and festivities. The games ranged from the sack race and egg-throwing to the legendary mud hole, from where few manage to escape! It all began in the afternoon with the games . . . and it all ended that night with a dance and the crowning of the new Autumn Queen.

An expert on acupuncture and the political turmoil in China talked to ASU-Beebe students on December 6, 1976, about the change in Chinese governments. Dr. E. Grey Dimond has been to China five times, once during the acupuncture operation of New York TIMES columnist James Reston. Dr. Dimond is a medical doctor who teaches at the University of Missouri.

"China someday will be a major industrial power," he said, "while the United States becomes an agricultural power."

Bob Hope

America's best loved comedian, Bob Hope, granted an exclusive interview to students from ASU-Beebe during a Jonesboro appearance in November. Hope told VANGUARD editor Garey Webb that he doesn't miss his overseas trips to entertain the troops. "I'm just glad nobody's fighting anymore," he said. Regarding his 50th year in show business--an anniversary marked this year--Hope told a large crowd of ASU students: "I didn't celebrate it, they found out about it. I think Crosby squealed."

One of the leading powers in the United States Senate, Gaylord Nelson of Wisconsin, warned about the nation's energy problems during a speech February 16. He told an audience of students, faculty, and townspeople that President Jimmy Carter must display courage in order to bring the country out of the energy crisis. "People will have to go back to sacrificing if there is to be any progress made," Nelson said.

Stanton Friedman

"I've never seen one. I've never seen Australia either, but I know it's there." So said a nuclear physicist and UFO expert Stanton Friedman during a February 21 appearance to talk about the topic, "Flying Saucers ARE Real." Friedman says the evidence is "overwhelming" that the Earth is being visited by extra-terrestrial beings. Why are they coming? "Maybe a Jupiter graduate student has to write a dissertation on a primitive planet," he said.

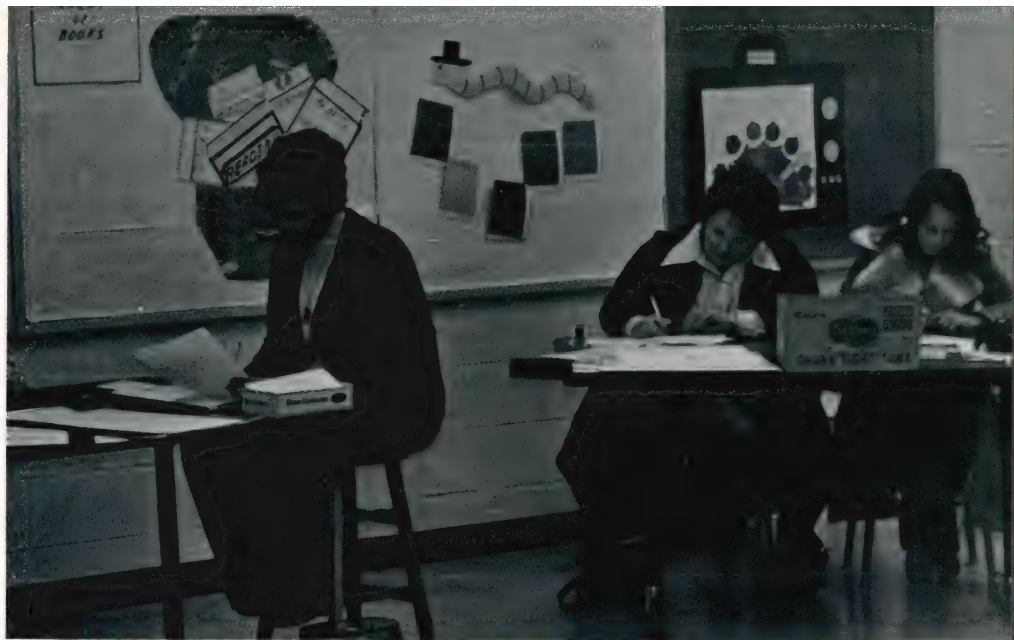

Fine Arts Center

ASU-Beebe boasts one of the finest, most well-built, and most expensive new buildings on any college campus in Arkansas. The long-awaited Fine Arts Center was completed this year. School officials say this building will be one of the most used places on campus soon. Total cost of the project (which includes three structures) is \$2.4 million. One of the finest areas in the Fine Arts Building is the auditorium, featuring a huge stage, with seats costing \$31,000 and stage curtains costing \$43,000. The building, the classrooms, the newest equipment are for the students of ASU-Beebe, and another sign that the campus is growing.

College is this and so much more. It is a place to learn of life as well as academics. A step between the protection of home and the realities of the world outside. A time to grow, to begin to formulate one's own values and opinions. College is where many discover the best way to be themselves.

In Memoriam

Linda Jo Welch

1941-1977

On Jan. 25, 1977, one of the school's most respected educators died in an automobile accident. Mrs. Linda Jo Welch was an assistant professor of business at ASU-Beebe, a college she joined in 1966. Mrs. Welch's survivors include a husband, two young daughters, and a reputation of caring for the students who took her classes. Shortly after her death, the school paper said, "In her classroom, you were a human being, not a number, a yellow card, or a name in a grade book."
